# // Free From Harsh Chemicals

 Ethyl Alcohol

 Ro Pure Water

Wide design for large coverage  
**RICH IN RO PURE WATER**  
 100,000-level purification workshop to ensure purity

## 75% Alcohol disinfection assured quality

Too high a concentration of alcohol will form a protective film on the surface of the bacteria, which will make it difficult to kill the bacteria completely when it enters the inside of the bacteria, and too low a concentration will not kill the bacteria. Facts have proved that 70-75% alcohol concentration has better bactericidal effect.
